

TransAct Technologies Cashless Ticket Printer Cleaning System

KWTRA-KTP8/950

This product is designed to maintain the clarity and legibility of cashless tickets printed by TransAct Epic 950® and 850® ticket printers. This two-step cleaning system has both a cleaning card to remove burnt-on particles, and a blotter card to remove excess moisture and contaminants within the printer. The two step process will:

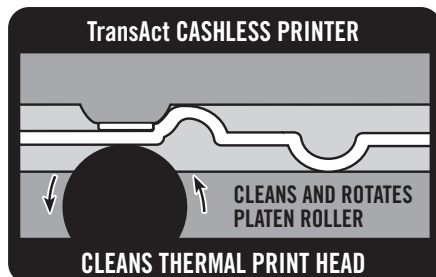

- Clean the print head
- Clean the entire surface of the platen roller
- Clean the ticket printer pathways

Use as:

- A scheduled maintenance product to maintain clarity of your cashless tickets
- An emergency maintenance product to correct printed ticket errors.

How Waffletechnology® Works

The cleaning waffles are flexible, raised platforms that allow the card to clean previously unreachable areas within the equipment.
